New **Crassevig** products
for Milan

Lene is the result of an eloquent analysis of proportions and dimensions. The solid oak or ash frame supports perfectly the curved seat and back: a product of great stability and a remarkable piece of craftsmanship.

The curved and rounded lines assure the essential and fluid shape of lene. the perfect curvature of the back offers body support and maximum comfort. The wood back legs support the back thanks to the unique joints, offering creativity and technology in a single product.

Lene collection comprises chair and armchair, in natural ash or oak with seat and back upholstered or veneered both stained or lacquered.
